

# Dental Practice Management System at your Doorsteps

NextGen Dental Practice Management System (DPMS) is a complete practice management software suite designed not only to handle patient charting and management, but also the complex financial transactions associated with the modern dental office. It can accommodate single location and multi-location practices as well as coordinate and manage the complex proceedings associated with managing a dental practice.

## NextGen DPMS Features:

- Patient Registration
- Appointment management with color coding features
- Tracking of Doctor vs. Assistant time setup
- Quick patient lookup
- Integrated clinical charting
- Complete treatment plan summary
- Efficient Bill summary and billing statements
- Very Comprehensive Reporting with easy customization
- Intuitive insurance estimator
- Online insurance claims (US version)
- Online insurance eligibility
- E-Doc Paperless Filing (US version)
- Scanner Interface
- Constant Monitoring of the Continuing Care (recall) status
- Periodontal Charting
- Easy Contact Management
- Comprehensive referral management system including Tracking and statistics
- Access security and elaborate user management

Presently three versions of Dental Practice Management System (DPMS) are available:

**NextGen DPMS Basic:** This is an excellent practice management tool for Dentists running their own individual dental clinics. The hardware required is a Pentium PC running Windows XP / 2000 / 2003 with a 15 / 17 " good monitor.
