DEPARTMENT OF CARDIOLOGY

To Whom It May Concern

This is to certify that we have "CardioLogix (Cathlab Reporting and Analysis System)" installed by NextGeneSolutions Private Limited at our Cathlab, which is working satisfactorily. We have found the software easy to understand and user friendly.

This software covers almost all the procedures carried out in the Cath Lab. It also has a unique feature of creating various '**Statistical Reports**' through its '**Analysis option**' which is very helpful. It also generates the '**Patient Reports**' quickly.

We, express full satisfaction on the performance of the product as well as the after sales support by the company.

Again the support team has an excellent understanding with our requirements and has modified it to our needs. We would not hesitate to recommend NextGen's CardioLogix to other institutions and Hospitals.

We wish them all the best for their future, and also look towards mutually rewarding relationship in the years to come by.
